

# POLYMER SUPPLIER FORUM 2025

04.06. / AGENDA

|               |                                                                                                                                                                          |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 08.30 – 09.00 | <b>MEET &amp; GREET</b>                                                                                                                                                  |
| 09.00 – 09.15 | <b>Welcome</b>                                                                                                                                                           |
| 09.15 – 09.30 | <b>News from the Moldflow Labs:<br/>Lab transition and R&amp;D projects.</b><br>PAUL BRINGAT, AUTODESK LTD., & JACOB TROTT, BEAUMONT INC.                                |
| 09.30 – 10.10 | <b>Material Database:<br/>What's new, advances in material characterization</b><br>PAUL BRINGAT, AUTODESK LTD                                                            |
| 10.10 – 10.55 | <b>Activity Session / Round Table</b>                                                                                                                                    |
| 10.55 – 11.25 | <b>COFFEE BREAK</b>                                                                                                                                                      |
| 11.25 – 11.40 | <b>STAMP: 3D Shrinkage Correction</b><br>FRANCO COSTA, AUTODESK LTD.                                                                                                     |
| 11.40 – 12.10 | <b>Development of an Intelligent Material Data Adaptation<br/>for Precise Deformation Simulation of<br/>Injection Moulded Components</b><br>SEBASTIAN SCHWAN, IKV AACHEN |
| 12.10 – 12.30 | <b>About the Significance of Material Data Plausibility<br/>in Daily Simulation Consulting business</b><br>CEMI KAHVE, PEG GMBH                                          |
| 12.30 – 13.30 | <b>LUNCH BREAK</b>                                                                                                                                                       |
| 13.30 – 14.10 | <b>Moldflow Material Cards<br/>Characterization trends, filler information and case studies</b><br>JACOB TROTT, BEAUMONT INC.                                            |
| 14.10 – 14.20 | <b>Closing Remarks</b>                                                                                                                                                   |
